Education

Graphic Era Hill University , Dehradun 2023 - 2027
B.Tech in Computer Science & Engineering

Technical Skills

Languages: Java, C/C++, JavaScript, Python, TypeScript
Frontend: React, React Native, HTML, CSS
Backend: Flask, Node.js, Java Spring
Database: SQL, SQLite
Tools: Git, Postman, Linux
Concepts: REST APIs, OOP, JWT Authentication, Cybersecurity, ERD

Project

- Hand Gesture & Voice Recognition Security System
- Implemented multimodal authentication using computer vision and voice recognition
 - Designed secure two-factor authentication system improving system reliability
 - Reduced authentication time by 40% through optimized processing
- Maritime Weather Dashboard
- Developed real-time weather dashboard using Flask REST APIs and SQLite
 - Implemented JWT-based authentication for secure data access
 - Integrated SQLAlchemy for efficient database management
- Railway Reservation System
- Developed full-stack reservation system with booking, cancellation, and scheduling features
 - Built frontend using HTML, CSS, JavaScript and backend logic for data processing

KEY ACHIEVEMENTS

- Reduced authentication time by 40% using multimodal security system
- Optimized backend API response time by 30% using query indexing and caching
- Reduced operational costs by 20% via efficient resource utilization

CERTIFICATIONS & LEARNING

- Python Programming – Covered data structures, OOP, and problem-solving
- Web Development – Built responsive applications using HTML, CSS, JavaScript, React
- Data Structures & Algorithms – Practiced problem-solving using Java/C++
- Machine Learning Basics – Studied supervised learning and model concepts
- Version Control – Used Git & GitHub for project management and collaboration
